	2002	19.8	21.9
	2003	18.9	20.6
	2004	19.1	20.1
	2005	19.7	26.9
	2006	19.4	21.2

Rates are per 100,000 and age-adjusted to the 2000 U.S. (19 age groups) standard.

* All rates are for males and females except breast and ovary which are female only and prostate which is male only.

^ Prior to 2004, only malignant cases of brain and CNS cancer were reportable.

% The number of dermatology clinics reporting to the ASCR has more than tripled since 2003. This increased reporting is most likely responsible for the significant increase in Melanoma incidence rates.
